

When wider access is needed, FREEMAN MARINE French doors perform like two single panel doors that seal to each other. The same high quality tooling and construction techniques used to make the single leaf Heavy Duty door are put to work in the construction of each 1620 French door. Heavy Duty doors feature thick panel skins, extra internal reinforcements, no exposed seams and all welded construction to create a rugged closure in individually dogged versions. Heavy Duty panels feature a lineal brushed finish, a FREEMAN trademark that creates a durable, uniform texture. When specified with optional paint to your color specifications, the 1620 Series welded construction results in a long lasting, smooth, seamless appearance. Doors offer welded-in windows and can accommodate special glazing. Solidly constructed and fully insulated, Heavy Duty French doors are suitable for the following typical high traffic access installations:

- Salon • Main Deck • Owner's Cabin

Model 1620 Recessed Handles
ISO Container Door
